

COMPOSER3D: the new design software

Quadrifoglio is now present in the library of the design software COMPOSER 3D. A tool that allows the creation of high quality virtual 3D rooms: simple, friendly, intuitive and with a strong graphic impact. Quadrifoglio's customers now have at their disposal the whole Quadrifoglio's products collection. 2D and 3D rooms; saving of perspective, isometric and plan views; possibility to create videos and virtual animations; getting the pricing of the products embedded, importation of Autocad plans and much more!

A new way to discover and get in touch with the wide range of Quadrifoglio's office products, the finishes and options available: all in a new software that will allow you to furnish a room with products, accessories and details with high quality and realistic results. Free download the software from the www.composer3d.it website, and discover the effectiveness of this tool! Please contact your representative in the export department of Quadrifoglio to receive further information and details.
